Subject Index*

A

Acetyl coenzyme A carboxylase, fatty acid biosynthesis in the erythrocyte, evidence in immature erythrocytes for the presence of, 37

Acid-base changes and dehydration on renal medullary production of ammonia, effect of, 905

Acyltransferase, lecithin-cholesterol, and serum cholesterol esterification in obstructive jaundice, 172

ADP-induced platelet aggregation by furosemide, inhibition of, 140

Adrenocorticotropic hormone (ACTH), some practical innovations in biological assay of, 803

Agarose gel electrophoresis, quantitative, of plasma lipoprotein, simple technique and two methods for standardization, 946

Alcohols, warfarin, warfarin metabolites, anticoagulant activity and pharmacology of, 925

Ammonia, renal medullary production of, effect of acid-base changes and dehydration on, 905

Androgens, variations of erythrocyte glycolysis following, 443

Angiotensin II, in human peripheral plasma, double antibody radioimmunoassay of renin activity and, 632

Announcement, 6

Antibodies, monoclonal, studies on, specificity and binding properties of a Waldenstrom macroglobulin with anti-γG activity, 393

Antibody to DNA and RNA, a solid-phase immunoassay for, 122

Antigens common to human and bacterial cells, autoagglutinin to blood group A stimulated by sepsis due to *Proteus mirabilis*, 919

fibrinogen-related, rapid detection of, in serum, 476

microbial, detection of, 447

Antigens—Cont'd

pneumococcal, detection of type-specific, by counterimmunoelectrophoresis, methodology and immunologic properties of pneumococcal antigens, 770

etiologic diagnosis of pneumococcal pneumonia, 778

Antihistamine principle in mammals, excretion of, 252

Anti-immunoglobulin activities in serum, pleural, and synovial fluids, pattern of, 230

Arterial hypertension, production of, by cadmium in dog, 549

Arthritis, acute gouty, complement as mediator of inflammation in, biological activities generated from complement by interaction of serum complement and sodium urate crystals, 761

4-(^{14}C)-L-Asparagine in body fluids and tissues, measurement of, methodology and application, 455

B

Balkan nephropathy, endemic, beta$_2$-microglobulin excretion as index of renal tubular disorders with special reference to, 897

Beta$_2$-microglobulin excretion as index of renal tubular disorders with special reference to endemic Balkan nephropathy, 897

Bile acid and cholesterol excretion with carbohydrate-rich diets, 818

salts and phenobarbital, biliary excretion of ^{3}-H digitoxin, modification by, 241

Biliary obstruction, extrahepatic, diagnosis of, in infants by immunochemical detection of LP-X and modified ^{131}I-Rose Bengal excretion test, 325

*January, pp. 1-156; February, pp. 157-324; March, pp. 325-488; April, pp. 489-640; May, pp. 641-808; June, pp. 809-984.

Bilirubin, hepatic, glucuronidation in Gilbert's syndrome, 829
test, rapid total, using sodium hypochlorite, 625
UDP-glucuronyl transferase activity, hepatic, and cytochrome P450 content in a surgical population and effects of preoperative drug therapy, 704
Biosynthesis and storage of catecholamines in pheochromocytoma and neuroblastoma cells, 887
Blacks, American, homozygous beta thalassemia in, problem of mild thalassemia, 857
Blood group A stimulated by sepsis due to *Proteus mirabilis*, antigens common to human and bacterial cells, autoagglutinin to, 919
Body fluids and tissues, 4-(^{14}C)-L-asparagine in, measurement of, methodology and application, 455
Bone marrow cells, human, after freezing, in vitro colony formation by, 317
Bromide, iodide, pertechnetate thiocyanate, in saliva from parotid, submandibular, and minor salivary glands in man, concentration of, 219

C

Cadmium in dog, production of arterial hypertension, 549
Calcitonin, immunoreactive, in medullary carcinoma of thyroid and in maternal and cord serum, 671
Carboxylase, acetyl coenzyme A, fatty acid biosynthesis in the erythrocyte, evidence in immature erythrocytes for the presence of, 37
Carcinoma, medullary, immunoreactive calcitonin in, of thyroid and in maternal and cord serum, 671
Catalase, erythrocyte, human, specific immunoassay for quantitative determination of, 133
Catecholamines, biosynthesis and storage of, in pheochromocytoma and neuroblastoma cells, 887
Cations, dissociation of zinc excretion from other, in man, 205
Cells, mammalian, comparative effect of chloramphenicol and thiamphenicol on DNA and mitochondrial protein synthesis in, 713
Cellular immune competence in man, phytohemagglutinin as a skin test for the evaluation of, 538
Cerebrospinal fluid complement in multiple sclerosis, 530
folate and vitamin B_{12} in anticonvulsant-induced megaloblastosis, 105
Chemotaxis of human leukocytes, responsiveness to *Mycoplasma pneumoniae*, 520
Chloramphenicol and thiamphenicol, comparative effect of, on DNA and mitochondrial protein synthesis in mammalian cells, 713
Chlorpromazine metabolism, determination of conjugated metabolites in the blood of schizophrenic patients, 467
Cholesterol excretion with carbohydrate-rich diets, bile acid and, 818
serum, esterification in obstructive jaundice, lecithin-cholesterol acyltransferase and, 172
Coagulation, intravascular, disseminated, endotoxin-induced, effect of saline loading on, 431
Colon, contribution of, to electrolyte and water conservation in man, 733
Colony formation, in vitro, by human bone marrow cells after freezing, 317
Complement as mediator of inflammation in acute gouty arthritis, studies on reaction between human serum complement and sodium urate crystals, 747
Connective tissue activation, the flux of connective tissue activating peptide during acute inflammation, 95
Conservation, electrolyte and water, contribution of colon to, in man, 733
Corticosteroid myopathy, experimental, oxidative respiration of skeletal muscle in, 365
Counterimmunoelectrophoresis, detection of type-specific pneumococcal antigens by, methodology and immunologic properties of pneumococcal antigens, 770
etiologic diagnosis of pneumococcal pneumonia, 778
Crohn's disease and ulcerative colitis, rectal electrolyte transport and mucosal permeability in, 342
Cyanate, gas chromatographic determination of carbamylation of hemoglobin S by, 941
Cyclic AMP levels and aggregation in human platelets by prostaglandin E_1, regulation of, 838
Cytochrome P450 content in surgical population and effects of preoperative drug therapy, hepatic bilirubin UDP-glucuronyl transferase activity and, 704
Cytomegalovirus infection, murine, thrombocytopenia, 53

D

Desferrioxamine action by selective radioiron labels of RE and parenchymal cells, study of, storage iron kinetics, 876
Dextrothyroxine, effects of, on the kinetics of prothrombin activity, proposed mechanism of the potentiation of warfarin by D-thyroxine, 273
Diets, carbohydrate-rich, bile acid and cholesterol excretion with, 818
Digitoxin, ^{3}H, modification by bile salts and phenobarbital, biliary excretion of, 241
Diphenylsulfones, comparative effects of DDS and hydroxylamine-DDS, hemolysis by, 267

Diphtheria toxin, estimate of myocardial damage induced by, 354
Disc-diffusion test, standard, and with sulfadiazine in experimental infection of mice, activity of minocycline against *Nocardia asteroides*, comparison with tetracycline in agar-dilution and, 787
Disodium ethane-1-hydroxy-1,1-diphosphonate (EHDP TM), renal handling of phosphorus and the renal response to parathyroid hormone, hyperphosphatemic effect of, 258
DNA, comparative effect of chloramphenicol and thiamphenicol on, and mitochondrial protein synthesis in mammalian cells, 713
Dogs, acute glucose loads in insulinized pancreatectomized, 696
plasma, with endotoxin shock, evidence for the presence of prostaglandin-like material in, 85
production of arterial hypertension by cadmium in, 549

E

Editors, letter from, 1
Electrolyte and water conservation, contribution of colon to, in man, 733
transport, rectal, and mucosal permeability in ulcerative colitis and Crohn's disease, 342
Electrophoresis, polyacrylamide gel, use of, in differentiating Type III hyperlipoproteinemia, 794
quantitative agarose gel, of plasma lipoprotein, a simple technique and two methods for standardization, 946
Endotoxin shock, evidence for the presence of prostaglandin-like material in the plasma of dogs with, 85
Energy metabolism of the heart, proposed mechanism for fatty acid effects on, 214
Enzymes, respiratory, of mitochondria isolated from liver tissue of patients, quantitative analysis of, 379
Enzymic-isotopic assay for histamine, microassay for studying allergic histamine release from human leukocytes using an, 297
Erythrocyte catalase, human, specific immunoassay for quantative determination of, 133
evidence in immature erythrocytes for the presence of acetyl coenzyme A carboxylase, fatty acid biosynthesis in the, 37
from patients with Lesch-Nyhan syndrome, increased activity of two enzymes of pyrimidine biosynthesis de novo in, 43
glycolysis following androgens, variations of, 443
porphyrin, free, a method for, FEP test, 932
Erythropoiesis, site of action of serum inhibitor of, 867
Esterification, serum cholesterol, in obstructive jaundice, lecithin-cholesterol acyltransferase and, 172
Excretion test, modified ^{131}I-Rose Bengal excretion, diagnosis of extrahepatic biliary obstruction in infants by immunochemical detection of LP-X and, 325
zinc, from other cations in man, dissociation of, 205
Extrahepatic biliary obstruction, diagnosis of, in infants by immunochemical detection of LP-X and modified ^{131}I-Rose Bengal excretion test, 325

F

Fabry's disease, enzymatic diagnosis of hemizygotes and heterozygotes, alpha-galactosidase activities in plasma, serum, urine, and leukocytes, 157
histochemical and biochemical studies of urinary lipids in metachromatic leukodystrophy and, 7
Factor X in tissue homogenates, evidence for the inactivation of Russell's viper venom by tissue homogenates in the presence of plasma, determination of, 77
Fatty acid biosynthesis in the erythrocyte, evidence in immature erythrocytes for the presence of acetyl coenzyme A carboxylase, 37
effects of energy metabolism of the heart, proposed mechanism for, 214
FEP test, a micromethod for free erythrocyte porphyrin, 932
Fibrin retraction, inhibition of platelet-dependent, by fibrin stabilizing factor (FSF, factor XIII), 641
stabilizing factor (FSF, factor XIII), inhibition of platelet-dependent fibrin retraction by, 641
Fluids, serum, pleural, and synovial, pattern of anti-immunoglobulin activities in, 230
Fluorometric assay of alpha-glucosidase and its application in the study of Pompe's disease, 450
Folate deficiency, dietary-induced, in human subjects, thrombokinetics in, 577
Freezing, in vitro colony formation by human bone marrow cells after, 317
Furosemide, inhibition of ADP-induced platelet aggregation by, 140

G

alpha-Galactosidase activities in plasma, serum, urine, and leukocytes, Fabry's disease, enzymatic diagnosis of hemizygotes and heterozygotes, 157
Gas chromatographic determination of the carbamylation of hemoglobin S by cyanate, 941
Gastric acid output in rat, continuous recording of, 961
Gastric juice, human, iron-binding by macromolecular components of, 719

Gilbert's syndrome, hepatic bilirubin glucuronidation in, 829
Glands, salivary, minor, parotid, and submandibular, in man, concentration of iodide, pertechnetate thiocyanate, and bromide in saliva from, 219
Glomerular renal disease, enhanced platelet function in, 651
Glomerulonephritis, acute, streptococcal infection of scabetic lesions related to, 182
Glucagon and endogenous insulin, in regulation of potassium homeostasis, evidence for role of, 809
Glucose intolerance, effect of nicotinic acid on growth hormone-induced lipolysis and, 568
loads, acute, in insulinized pancreatectomized dogs, 686
-6-phosphate dehydrogenase, erythrocytic glutathione reductase, and 6-phosphogluconic dehydrogenase deficiencies in populations of the United States, South Vietnam, Iran, and Ethiopia, 603
erythrocytic, 6-phosphogluconic dehydrogenase, and glutathione reductase deficiencies, visual test for, 613
alpha-Glucosidase, fluorometric assay of, and its application in the study of Pompe's disease, 450
Glucuronidation, hepatic bilirubin, in Gilbert's syndrome, 829
Glutathione reductase, erythrocytic, glucose-6-phosphate dehydrogenase, and 6-phosphogluconic dehydrogenase deficiencies in populations of the United States, South Vietnam, Iran, and Ethiopia, 603
visual test for, 613
Glycolysis, erythrocyte, following androgens, variations of, 443
Growth rate and ^{59}Fe uptake in the progeny of Rauscher leukemia virus-infected splenic colony-forming units following transplantation, 489

H

H-spike, position of, in selective pharmacologic production of A-V block or A-V junctional rhythm, 506
Heart, proposed mechanism for fatty acid effects on energy metabolism of, 214
Hemoglobin, gas chromatographic determination of carbamylation of, by cyanate, 941
Hemolysis by diphenylsulfones, comparative effects of DDS and hydroxylamine-DDS, 267
Heparin, plasma, a unique practical, submicrogram-sensitive assay, 298
Hepatic bilirubin glucuronidation in Gilbert's syndrome, 829
UDP-glucuronyl transferase activity and cytochrome P450 content in surgical population, and effects of preoperative drug therapy, 704
Histamine, microassay for studying allergic histamine release from human leukocytes using an enzymic-isotopic assay for, 297
Homeostasis, potassium, evidence for role of endogenous insulin and glucagon in regulation of, 809
Hormone, adrenocorticotropic (ACTH), some practical innovations in biological assay of, 803
parathyroid, hyperphosphatemic effect of disodium ethane-1-hydroxy-1,1-diphosphonate (EHDP TM), renal handling of phosphorus and the renal response to, 258
Hydroxylamine-DDS, hemolysis by diphenylsulfones, comparative effects of DDS and, 267
25-Hydroxyvitamin D in sex-linked hypophosphatemic vitamin D–resistant rickets, serum concentrations of, 22
Hyperlipoproteinemia, Type III, use of polyacrylamide gel electrophoresis in differentiating, 794
Hypermuramidasemia, studies on, in the normal and chloroleukemic rat, role of the kidney, 116
Hypertension, arterial, production of, by cadmium in dog, 549
Hypochlorite, sodium, rapid total bilirubin test using, 625
Hypophosphatemic vitamin D–resistant rickets, sex-linked, serum concentrations of 25-hydroxyvitamin D in, 22

I

^{125}I-labeled 4-iodoantipyrine (I-Ap) washout, comparison of marrow and cortical bone blood flow by, 497
Immune complex nephritis, autologous, in rats, immunosuppressive treatment of, 661
Immunoassay, solid-phase, for antibody to DNA and RNA, 122
specific, for quantitative determination of human erythrocyte catalase, 133
Immunoreactive calcitonin in medullary carcinoma of thyroid and in maternal and cord serum, 671
Immunosuppressive treatment of autologous immune complex nephritis in rats, 661
Infants, diagnosis of extrahepatic biliary obstruction in, by immunochemical detection of LP-X and modified ^{131}I-Rose Bengal excretion test, 325
Infarction, myocardial, myocardial zinc metabolism in experimental, 194
Infection, murine cytomegalovirus, thrombocytopenia in, 53
Inflammation, acute, connective tissue activation, the flux of connective tissue activating peptide during, 95
gouty arthritis, complement as mediator of, studies on reaction between human serum complement and sodium urate crystals, 747

Insulin, endogenous, and glucagon in regulation of potassium homeostasis, evidence for role of, 809
Insulin secretion and triglyceride concentration, relationship between, in endogenous lipemia, 682
Intestinal absorption and concurrent chemical changes of methylcobalamin, 557
Intravascular coagulation, intravascular, endotoxin-induced, effect of saline loading on, 431
Iodine, pertechnetate, thiocyanate, and bromide in saliva from parotid, submandibular, and minor salivary glands in man, concentration of, 219
Iron-binding by macromolecular components of human gastric juice, 719

J

Jaundice, obstructive, lecithin-cholesterol acyltransferase and serum cholesterol esterification in, 172

K

Kidney, role of, in studies on the hypermuramidasemia in the normal and chloroleukemic rat, 116
Kinetics, storage iron, study of desferrioxamine action by selective radioiron labels of RE and parenchymal cells, 876

L

Lecithin-cholesterol acyltransferase and serum cholesterol esterification in obstructive jaundice, 172
Lesch-Nyhan syndrome, increased activity of two enzymes of pyrimidine biosynthesis de novo in erythrocytes from patients with, 43
Lesions, scabetic, related to acute glomerulonephritis, streptococcal infection of, 182
Leukemia, myelocytic, acute, new white cell test which measures individual phagocyte function in a mixed leukocyte population, a neutrophil defect in, 311
Leukocytes, human, chemotaxis of, responsiveness to *Mycoplasma pneumoniae*, 520
  using an enzymic-isotopic assay for histamine, microassay for studying allergic histamine release from, 297
  mixed, population, a neutrophil defect in acute myelocytic leukemia, new white cell test which measures individual phagocyte function in, 311
  plasma, serum, and urine, Fabry's disease, enzymatic diagnosis of hemizygotes and heterozygotes, alpha-galactosidase activities in, 157
  polymorphonuclear, bactericidal assay, a statistical approach to the, 148
Leukodystrophy, metachromatic, and Fabry's disease, histochemical and biochemical studies of urinary lipids in, 7
Lipemia, endogenous, relationship between insulin secretion and triglyceride concentration in, 682
Lipid peroxides in platelets, studies on, effect on physiologic platelet functions, 587
  urinary, in metachromatic leukodystrophy and Fabry's disease, histochemical and biochemical studies of, 7
Lipolysis, growth hormone-induced, and glucose intolerance, effect of nicotinic acid on, 568
Lipoprotein, plasma, quantitative agarose gel electrophoresis of, simple technique and two methods for standardization, 946
Liver tissue of patients, quantitative analysis of respiratory enzymes of mitochondria isolated from, 379
LP-X, immunochemical detection of, and modified ^{131}I-Rose Bengal excretion test, diagnosis of extrahepatic biliary obstruction in infants by, 325

M

Macroglobulin, Waldenström, specificity and binding properties of a, with anti-γG activity, studies on monoclonal antibodies, 393
Mammals, excretion of an antihistamine principle in, 252
Marrow and cortical bone blood flow, comparison of, by ^{125}I-labeled 4-iodoantipyrine (I-Ap) washout, 497
Megaloblastosis, cerebrospinal fluid folate and vitamin B_{12} in anticonvulsant-induced, 105
Metabolism, energy, of the heart, proposed mechanism for fatty acid effects on, 214
  zinc, myocardial, in experimental myocardial infarction, 194
Metabolites, warfarin, anticoagulant activity and pharmacology of warfarin alcohols, 925
Metachromatic leukodystrophy and Fabry's disease, histochemical and biochemical studies of urinary lipids in, 7
Methylcobalamin, intestinal absorption and concurrent chemical changes of, 557
Mice, activity of minocycline against *Nocardia asteroides*, comparison with tetracycline in agar-dilution and standard disc-diffusion tests and with sulfadiazine in experimental infection of, 787
Microassay for studying allergic histamine release from human leukocytes using an enzymic-isotopic assay for histamine, 297

Microbial antigens, detection of, 447
Micromethod for free erythrocyte porphyrin, FEP test, 932
Minocycline, activity of, against *Nocardia asteroides*, comparison with tetracycline in agar-dilution and standard disc-diffusion tests and with sulfadiazine in experimental infection of mice, 787
Mitochondria isolated from liver tissue of patients, quantitative analysis of respiratory enzymes of, 379
Monoclonal antibodies, studies on, specificity and binding properties of a Waldenström macroglobulin with anti-γG activity, 393
Mucosal permeability and rectal electrolyte transport in ulcerative colitis and Crohn's disease, 342
Multiple sclerosis, cerebrospinal fluid complement in, 530
Murine cytomegalovirus infection, thrombocytopenia in, 53
Muscle, skeletal, oxidative respiration of, in experimental corticosteroid myopathy, 365
Mycoplasma pneumoniae, responsiveness to, chemotaxis of human leukocytes, 520
Myelocytic leukemia, acute, new white cell test which measures individual phagocyte function in a mixed leukocyte population, neutrophil defect in, 311
Myocardial damage, estimate of, induced by diphtheria toxin, 354
infarction, myocardial zinc metabolism in experimental, 194
Myopathy, experimental corticosteroid, oxidative respiration of skeletal muscle in, 365

N

Nephritis, autologous immune complex, in rats, immunosuppressive treatment of, 661
Nephropathy, endemic Balkan, beta$_2$-microglobulin excretion as an index of renal tubular disorders with special reference to, 897
Neuroblastoma and pheochromocytoma cells, biosynthesis and storage of catecholamines in, 887
Neutrophil defect in acute myelocytic leukemia, new white cell test which measures individual phagocyte function in mixed leukocyte population, 311
Nicotinic acid, effect of, on growth hormone induced lipolysis and glucose intolerance, 568
Nocardia asteroides, activity of minocycline against, comparison with tetracycline in agar-dilution and standard disc-diffusion tests and with sulfadiazine in experimental infection of mice, 787

O

Obese men, fasting, energy expenditure in, 421
Obstruction, biliary, extrahepatic, diagnosis of, in infants by immunochemical detection of LP-X and modified ^{131}I-Rose Bengal excretion test, 325
Oxidative respiration of skeletal muscle in experimental corticosteroid myopathy, 365

P

Parathyroid hormone, hyperphosphatemic effect of disodium ethane-1-hydroxy-1,1-diphosphonate (EHDP TM), renal handling of phosphorus and the renal response to, 258
Parenchymal cells, study of desferrioxamine action by selective radioiron labels of RE and, storage iron kinetics, 876
Parotid, submandibular, and minor salivary glands in man, concentration of iodide, pertechnetate thiocyanate, and bromide in saliva from, 219
Peptide, flux of connective tissue activating, during acute inflammation, connective tissue activation, 95
Pertechnetate thiocyanate, iodide, and bromide in saliva from parotid, submandibular, and minor salivary glands in man, concentration of, 219
Phagocyte function, individual, in a mixed leukocyte population, a neutrophil defect in acute myelocytic leukemia, new white cell test which measures, 311
Phenobarbital, and bile salts, biliary excretion of ^{3}H digitoxin, modification by, 241
Pheochromocytoma and neuroblastoma cells, biosynthesis and storage of catecholamines in, 887
6-Phosphogluconic dehydrogenase, erythrocytic glucose-6-phosphate dehydrogenase, and glutathione reductase deficiencies, visual test for, 613
glutathione reductase, glucose-6-phosphate dehydrogenase, deficiencies in populations of the United States, South Vietnam, Iran, and Ethiopia, 603
Phytohemagglutinin as a skin test for the evaluation of cellular immune competence in man, 538
Pituitary-gonadal axis in postmenopausal women, quantitative relationships of the, 28
Plasma, determination of factor X in tissue homogenates, evidence for the inactivation of Russell's viper venom by tissue homogenates in the presence of, 77
dogs with endotoxin shock, evidence for the presence of prostaglandin-like material in the, 85

Plasma—Cont'd
heparin, a unique, practical, submicrogram-sensitive assay, 298
human peripheral, double antibody radioimmunoassay of renin activity and angiotensin II in, 632
lipoprotein, quantitative agarose gel electrophoresis of, a simple technique and two methods for standardization, 946
serum, urine, and leukocytes, Fabry's disease, enzymatic diagnosis of hemizygotes and heterozygotes, alpha-galactosidase activities in, 157
Plasminogen, highly sensitive method for assay of, 484
Platelet adherence to protein-coated surfaces, modification of, 280
aggregation, ADP-induced, inhibition of, by furosemide, 140
function, enhanced, in glomerular renal disease, 651
human, regulation of cyclic AMP levels and aggregation in, by prostaglandin E_1, 838
studies on lipid peroxides in, effect on physiologic platelet functions, 587
Pleural, serum, and synovial fluids, pattern of anti-immunoglobulin activities in, 230
Pneumococcal antigens, detection of type-specific, by counterimmunoelectrophoresis, etiologic diagnosis of pneumococcal pneumonia, 778
methodology and immunologic properties of pneumococcal antigens, 770
Pneumonia, pneumococcal, etiologic diagnosis of, detection of type-specific pneumococcal antigens by counter-immunoelectrophoresis, 778
Polyacrylamide gel electrophoresis, use of, in differentiating Type III hyperlipoproteinemia, 794
Pompe's disease, fluorometric assay of alpha-glucosidase and its application in the study of, 450
Porphyrin, free erythrocyte, a method for, FEP test, 932
Postmenopausal women, quantitative relationships of the pituitary-gonadal axis in, 28
Potassium homeostasis, evidence for role of endogenous insulin and glucagon in regulation of, 809
Prostaglandin E_1, regulation of cyclic AMP levels and aggregation in human platelets by, 838
Proteus mirabilis, antigens common to human and bacterial cells, autoagglutinin to blood group A stimulated by sepsis due to, 919
Prothrombin activity, effects of dextrothyroxine on the kinetics of, proposed mechanism of the potentiation of warfarin by D-thyroxine, 273
Pyoderma, streptococcal, factors influencing serum antibody responses in, 410
Pyrimidine biosynthesis de novo in erythrocytes from patients with Lesch-Nyhan syndrome, increased activity of two enzymes of, 43

R

Radioiron labels, selective, of RE and parenchymal cells, storage iron kinetics, study of desferrioxamine action by, 876
Radioimmunoassay, double antibody, of renin activity and angiotensin II in human peripheral plasma, 632
Rat, gastric acid output in, continuous recording of, 961
immunosuppressive treatment of autologous immune complex nephritis in, 661
normal and chloroleukemic, studies on hypermuramidasemia in, the role of the kidney, 116
Rauscher leukemia virus-infected splenic colony forming units following transplantation, growth rate, and ^{59}Fe uptake in the progeny of, 489
RE cells, parenchymal and, study of desferrioxamine action by selective radioiron labels of, storage iron kinetics, 876
Rectal electrolyte transport and mucosal permeability in ulcerative colitis and Crohn's disease, 342
Renal disease, glomerular, enhanced platelet function in, 651
tubular disorders with special reference to endemic Balkan nephropathy, $beta_2$-microglobulin excretion as index of, 897
Renin activity and angiotensin II in human peripheral plasma, double antibody radioimmunoassay of, 632
Respiratory enzymes of mitochondria isolated from liver tissue of patients, quantitative analysis of, 379
Rhythm, junctional, A-V, position of the H-spike in selective pharmacologic production of A-V block or, 506
Rickets, serum concentration of 25-hydroxyvitamin D in sex-linked hypophosphatemic vitamin D-resistant, 22
Rose Bengal excretion test, modified ^{131}I-, diagnosis of extrahepatic biliary obstruction in infants by immunochemical detection of LP-X and, 325
Russell's viper venom, determination of factor X in tissue homogenates, evidence for the inactivation of, by tissue homogenates in the presence of plasma, 77

S

Saline loading, effect of, on endotoxin-induced disseminated intravascular coagulation, 431

Salivary glands, minor, parotid, and submandibular, in man, concentration of iodide, pertechnetate thiocyanate, and bromide in saliva from, 219
Scabetic lesions related to acute glomerulonephritis, streptococcal infection of, 182
Sepsis due to *Proteus mirabilis*, antigens common to human and bacterial cells, autoagglutinin to blood group A stimulated by, 919
Serum antibody responses in streptococcal pyoderma, factors influencing, 410
maternal and cord, immunoreactive calcitonin in medullary carcinoma of thyroid and, 671
plasma, urine, and leukocytes, Fabry's disease, enzymatic diagnosis of hemizygotes and heterozygotes, alpha-galactosidase activities in, 157
pleural, and synovial fluids, pattern of anti-immunoglobulin activities, in, 230
rapid detection of fibrinogen-related antigens in, 476
Shock, endotoxin, evidence for the presence of prostaglandin-like material in the plasma of dogs with, 85
Sickle phenomenon, in vivo, a reappraisal, 850
Skeletal muscle, oxidative respiration of, in experimental corticosteroid myopathy, 365
Streptococcal pyoderma, factors influencing serum antibody responses in, 410
Submandibular, parotid, and minor salivary glands in man, concentration of iodide, pertechnetate thiocyanate, and bromide in saliva from, 219
Surfaces, protein-coated, modification of platelet adherence to, 280
Syndrome, Gilbert's, hepatic bilirubin glucuronidation in, 829
Synovial, pleural, and serum fluids, pattern of anti-immunoglobulin activities in, 230

T

Test, white cell, new, which measures individual phagocyte function in a mixed leukocyte population, a neutrophil defect in acute myelocytic leukemia, 311
Tetracycline in agar-dilution and standard disc-diffusion tests and with sulfadiazine in experimental infection of mice, activity of minocycline against *Nocardia asteroides*, comparison with, 787
Thalassemia, homozygous beta, in American Blacks, problem of mild thalassemia, 857
Thiamphenicol and chloramphenicol, comparative effect of, on DNA and mitochondrial protein synthesis in mammalian cells, 713
Thiocyanate, pertechnetate, iodide, and bromide in saliva from parotid, submandibular, and minor salivary glands in man, concentration of, 219
Thrombocytopenia in murine cytomegalovirus infection, 53
thrombokinetic studies in alcohol-related, 64
Thrombokinetics in dietary-induced folate deficiency in human subjects, 577
studies in alcohol-related thrombocytopenia, 64
Thyroid, medullary carcinoma of, immunoreactive calcitonin in, and in maternal and cord serum, 671
Tissue homogenates, evidence for the inactivation of Russell's viper venom by tissue homogenates in the presence of plasma, determination of factor X in, 77
Tissue, liver, of patients, quantitative analysis of respiratory enzymes of mitochondria isolated from, 379
Toxin, diphtheria, estimate of myocardial damage induced by, 354
Transplantation, growth rate and ^{59}Fe uptake in the progeny of Rauscher leukemia virus-infected splenic colony forming units following, 489
Triglyceride concentration in endogenous lipemia, relationship between insulin secretion and, 682

U

Ulcerative colitis and Crohn's disease, rectal electrolyte transport and mucosal permeability in, 342
Urinary lipids in metachromatic leukodystrophy and Fabry's disease, histochemical and biochemical studies of, 7
Urine, plasma, serum, and leukocytes, Fabry's disease, enzymatic diagnosis of hemizygotes and heterozygotes, alpha-galactosidase activities in, 157

V

Vitamin B_{12}, cerebrospinal fluid folate and, in anticonvulsant-induced megaloblastosis, 105
Vitamin D-resistant rickets, hypophosphatemic, serum concentrations of 25-hydroxyvitamin D in sex-linked, 22

W

Waldenström macroglobulin, specificity and binding properties of a, with anti-γG activity, studies on monoclonal antibodies, 393
Warfarin metabolites, anticoagulant activity and pharmacology of warfarin alcohols, 925
potentiation of, by D-thyroxine, effects of dextrothyroxine on the kinetics of prothrombin activity, proposed mechanism of, 273

Water and electrolyte conservation, contribution of colon to, in man, 733
White cell test, new, which measures individual phagocyte function in a mixed leukocyte population, neutrophil defect in acute myelocytic leukemia, 311

Z

Zinc excretion, from other cations in man, dissociation of, 205
metabolism, myocardial, in experimental myocardial infarction, 194

Subject Index*

A

Acid phosphatases in human plasma, 446

Adenocarcinomas, activation of coagulation by extracts of mucus, possible pathway of intravascular coagulation accompanying, 255

Adenosine diphosphate and platelet concentrations and temperature, quantitative parameterization of light transmission properties of citrated, platelet-rich plasma as function of, 137

Adipose tissue in diphtheritic guinea pigs, defect in lipid mobilization from, 187

Agglutinins, elevated cold, IgG, IgA, and IgM cold-reactive immunoglobulins in 19 patients with, 67

Aggregation, platelet, factor X-induced, the role of heparin and the plasma inhibitor to activated factor X, inhibition of activated, 390

Albumin-binding sites, studies with some novel uricosuric agents and their metabolites, correlation between clinical activity and drug-induced displacement of urate from its, 412

Albumins, urinary, immunocore electrophoresis of, 326

Aldosterone and cortisol on the renal concentrating mechanism, effects of, 784

Amino acids, intraluminal and postabsorptive effects of, on pancreatic enzyme secretion, 241

Ammoniagenesis, renal, and tissue glutamine, glutamine synthetase, and glutaminase I levels in potassium-deficient rats, 208

Analyzer, new, oxygen content determination using a, the Lex-O_2-Con, 342

Anemia, hemolytic, erythropoietin excretion in bone marrow failure and, 438

Antibacterial defenses of the lung, effect of pulmonary edema on, 634

Antibodies, bacterial, naturally occurring, radioimmunologic measurements of, human serum antibodies reactive with *Escherichia coli* in gastrointestinal and immunologic disorders, 125

human serum, reactive with *Escherichia coli* in gastrointestinal and immunologic disorders, radioimmunologic measurements of naturally occurring bacterial antibodies, 125

ribonucleoprotein, frequency and clinical significance in systemic lupus erythematosus, scleroderma, and mixed connective tissue disease, 769

studies of, in pemphigoid and pemphigus, 248

Antibody, precipitating, against pigeon antigens in sera of asymptomatic pigeon breeders, 372

to Australia antigen, detection with a simple radioimmune assay, incidence in military populations, and role in the prevention of hepatitis B with gamma globulin, 317

Anticoagulants, determination of fibrinogen in normal human plasma in presence and absence of, 822

Antigen, Australia, antibody to, detection with a simple radioimmune assay, incidence in military populations, and role in the prevention of hepatitis B with gamma globulin, 317

persistent, lymphocyte function in normal people with, 79

Antigens, mitogens, and homologous lymphocytes, whole-blood culture technique for functional studies of lymphocyte reactivity to, 500

pigeon, in sera of asymptomatic pigeon breeders, precipitating antibody against, 372

Antiheparin protein releasable from platelets, purification and properties, platelet factor 4, 754

*July, pp. 1-186; August, pp. 187-348; September, pp. 349-528; October, pp. 529-694; November, pp. 695-846; December, pp. 847-1020.

Aplasia, studies on pure red cell, development of two-stage erythroblast cytotoxicity method and role of complement, 31
Arthritis, rheumatoid and systemic lupus erythematosus patients measured by histochemical and spectrophotometric method nitroblue tetrazolium dye reduction by peripheral leukocytes from, 513
Australia antigen, antibody to, detection with a simple radioimmune assay, incidence in military populations, and role in the prevention of hepatitis B with gamma globulin, 317
persistent, lymphocyte function in normal people with, 79

B

Bile acid synthesis in hamster, induced alterations in rate-limiting enzymes of hepatic cholesterol and, 858
pigments of body fluids, qualitative analysis by thin-layer chromatography, free and conjugated, 483
secretion in rat, acute and chronic effects of ethanol administration on, 215
Blood, bank, outdated, role of fructose in restoration of organic phosphate compounds in, 489
disorders, red cell density in various, 297
flows, hepatic and portal, by an indicator dilution technique, simultaneous estimation of, 836
measurement of volatile mercaptans in whole, 674
whole, during chrysotherapy, gold distribution in, 930
rapid assay of $^{14}CO_2$ in, 166
simplified assay for galactokinase activity in, 818
Body calcium, total, and long-term calcium balance in chronic renal disease, 226
fluids, qualitative analysis by thin-layer chromatography, free and conjugated bile pigments of, 483
water, total, rapid method for the determination of deuterium oxide in urine, application to measurement of, 170
Bone marrow and blood cells, differences between, in multiple myeloma and chronic lymphocytic leukemia, effects of therapy, immunoglobulin receptors on human leukocytes, 611
failure and hemolytic anemia, erythropoietin excretion in, 438
turnover, effect of mithramycin on normal and abnormal, 576
Breeders, pigeon, asymptomatic, precipitating antibody against pigeon antigens in sera of, 372

C

Cadmium known to induce hypertension, elevated circulating renin activity in rats following doses of, 399
Calcium balance in chronic renal disease, total body calcium and long-term, 226
low dietary, dose-response to lead ingestion in rats fed, 92
Calcium—Cont'd
pyrophosphate crystals, studies on mechanism of inflammation induced by, 86
total body, and long-term calcium balance in chronic renal disease, 226
Canine factor X (Stuart-Prower factor) deficiency, 560
C-band staining technique for chromosomes, rapid, 692
Cell-cycling characteristics of exogenous spleen colony-forming units, 740
Cerebrospinal fluid, measurement of the third component of complement in, by modified electroimmunodiffusion, 154
Chloramine-T method, unsatisfactory biologic behavior of ^{125}I-fibrinogen labeled by, 267
Cholestane-3β, 5α, 6β-triol, cholesterol balance and turnover in genetically hypercholesterolemic pigeons, their response to treatment with a hypocholesterolemic drug, 793
Cholesterol balance and turnover in genetically hypercholesterolemic pigeons: their response to treatment with a hypocholesterolemic drug cholestane-3β, 5α, 6β-triol, 793
hepatic, rate-limiting enzymes of, and bile acid synthesis in hamster, induced alterations in, 858
lipoprotein, estimation versus measurement with preparative ultracentrifuge, cord-blood low-density, 467
metabolism in man, effects of colestipol, a new bile-acid-sequestering resin, on, 876
plasma, total, using gas-liquid chromatography, micromethod for analysis of, 656
radioactive, labeling plasma lipoproteins with, 111
Chromatography, column, detection of hemoglobins S and C at birth, a rapid screening procedure by, 303
gas-liquid, and electron capture detection, separation and determination of urinary homovanillic acid and isohomovanillic acid by, 829
micromethod for analysis of total plasma cholesterol using, 656
system, hemoglobin-haptoglobin bond, dissociation of complex and recovery of native haptoglobin in affinity, chromatography, 991
thin-layer, free and conjugated bile pigments of body fluids, qualitative analysis by, 483
Wick, for immunoassay of serum thyrotropin, 158
Chromosomes, rapid C-band staining technique for, 692
Chrysotherapy, gold distribution in whole blood during, 930
$^{14}CO_2$ in whole blood, rapid assay of, 166
Colestipol, a new bile-acid-sequestering resin, on cholesterol metabolism in man, effects of, 876
Collagen-coated surface, adherence of platelets to, development of quantitative method, 978

Collagen—Cont'd
nucleic acids, and noncollagenous protein of connective tissue, effect of zinc deficiency on, 951
Complement, role of, studies on pure red cell aplasia, development of two-stage erythroblast cytotoxicity method and, 31
third component of, in cerebrospinal fluid, measurement of, by modified electroimmunodiffusion, 154
Connective tissue disease, mixed, systemic lupus erythematosus, and scleroderma, ribonucleoprotein antibodies, frequency and clinical significance in, 769
effect of zinc deficiency on nucleic acids, collagen, and noncollagenous protein of, 951
Contraceptives, oral, and folate absorption, 869
Cord-blood low-density lipoprotein cholesterol, estimation versus measurement with preparative ultracentrifuge, 467
Cortisol and aldosterone on the renal concentrating mechanism effects of, 784
inhibition, mechanism of, adoptive transfer of tuberculin sensitivity, 366
Cyclophosphamide, augmented incidence of neoplasia in NZB/NZW mice treated with long-term, 619
Cytoplasmic and mitochondrial enzymes from isolated and perfused rat liver treated with phalloidin, rate of release of, 695
Cytosine arabinoside and methotrexate, cycling characteristics of endogenous spleen colony-forming cells as measured with, 727
Cytotoxicity, erythroblast, two-stage, method and role of complement, studies on pure red cell aplasia, 31

D

Dehydrogenase, glucose-6-phosphate (G-6-PD) associated with G-6-PD deficiency in Puerto Ricans, variants of, 432
Density, red cell, in various blood disorders, 297
Deoxyribonuclease and ribonuclease activities in zinc-deficient tissues, 461
Deuterium oxide in urine, rapid method for determination of, application to measurement of total body water, 170
Diabetes mellitus and uremia, monosaccharides and polyols in, 809
Dihydroxyacetone by intact erythrocytes, metabolism of, 534
Diphosphonates, influence of, on progress of experimentally induced osteoporosis, 567
Disc, intervertebral, in idiopathic scoliosis, glycosaminoglycans of, 938
Disease, sickle cell, platelet function and survival in, 44

E

Elastase, induction of emphysema with, evolution of lesion and influence of serum, 349
Electroimmunodiffusion, modified, measurement of third component of complement in cerebrospinal fluid by, 154
Electron capture detection, separation and determination of urinary homovanillic acid and iso-homovanillic acid by gas-liquid chromatography and, 829
Electrophoresis, immunocore, of urinary albumins, 326
Emboli, pulmonary, experimentally induced, reversible right ventricular hypertrophy in, 962
Emphysema, induction of with elastase, evolution of lesion and influence of serum, 349
Enzymes, cytoplasmic and mitochondrial, from isolated and perfused rat liver treated with phalloidin, rate of release, of, 695
rate-limiting, of hepatic cholesterol and bile acid synthesis in hamster, induced alterations in, 858
Eosinophils and neutrophils from guinea pig peritoneal fluids, selective stimulation and purification of, 522
Epinephrine, effect of, on platelet lipid metabolism, 554
Erythematosus, lupus, systemic, scleroderma, and mixed connective tissue disease, ribonucleoprotein antibodies, frequency and clinical significance in, 769
Erythroblast cytotoxicity, two-stage, method and role of complement, studies on pure red-cell aplasia, 31
Erythrocytes, human, incubated, prehemolytic changes in membrane protein of, 719
intact, metabolism of dihydroxyacetone, 534
separation of, influence of temperature and method of centrifugation on, 334
sheep, decreased γ-glutamylcysteine synthetase, probable cause of glutathione deficiency in, 713
Erythropoiesis, enhancement of, by prostaglandin, 704
Erythropoietin excretion in bone marrow failure and hemolytic anemia, 438
recent contributions of the mechanism of action and clinical relevance of, 847
Escherichia coli, human serum antibodies reactive with, in gastrointestinal and immunologic disorders, radioimmunologic measurements of naturally occurring bacterial antibodies, 125
Ethanol administration, acute and chronic effects of, on bile secretion in rat, 215
and oleate, effect of, gluconeogenesis in fatty liver of rat, 419

F

Factor X, canine (Stuart-Prower factor) deficiency, 560

Factor X—Cont'd
-induced platelet aggregation, the role of heparin and the plasma inhibitor to activated factor X, inhibition of activated, 390
Fibrin, interaction of cultured human fibroblasts with, modification by drugs and aging in vitro, 605
urinary, degradation products, characterization and significance of, 377
Fibrinogen in normal human plasma in the presence and absence of anticoagulants, determination of, 822
Fibrinolysis in patients with poststreptococcal acute glomerulonephritis, relationship of serum B_1C globulin to, 776
Fibroblasts, cultured human, with fibrin, modification by drugs and aging in vitro, interaction of, 605
Fluids, body, qualitative analysis by thin-layer chromatography, free and conjugated bile pigments of, 483
peritoneal, guinea pig, selective stimulation and purification of eosinophils from, 522
Folate absorption, oral contraceptives and, 869
Fructose in restoration of organic phosphate compounds in outdated bank blood, role of, 389

G

Galactokinase activity in whole blood, a rapid simplified assay for, 818
Gallbladder, absorption of lecithin and lysolecithin by, 891
Gamma globulin, antibody to Australia antigen, detection with simple radioimmune assay, incidence in military populations, and role in prevention of hepatitis B with, 317
Gas-liquid chromatography and electron capture detection, separation and determination of urinary homovanillic acid and iso-homovanillic acid by, 829
micromethod for analysis of total plasma cholesterol using, 656
Globulin, serum B_1C, to fibrinolysis in patients with poststreptococcal acute glomerulonephritis, relationship of, 776
Glomerulonephritis, poststreptococcal acute, relationship of serum B_1C globulin to fibrinolysis in patients with, 776
Gluconeogenesis in fatty liver of rat, the effect of oleate and ethanol, 419
Glucose, comparison of 4-hydroxybenzoic acid hydrazide (PAHBAH) with other reagents for determination of, 649
injection, intravenous, estimation of early insulin response to, 101
levels, circulating, simple method for regulating and monitoring, 179
Glucose-6-phosphate dehydrogenase (G-6-PD) associated with G-6-PD deficiency in Puerto Ricans, variants of, 432
β-Glucuronidase deficiency mucopolysaccharidosis, methods for enzymatic diagnosis, 969
Glutamine synthetase, tissue glutamine, and glutaminase I levels in potassium-deficient rats, renal ammoniagenesis and tissue glutamine, 208
γ-Glutamylcysteine synthetase, decreased, probable cause of glutathione deficiency in sheep erythrocytes, 713
Glutathione deficiency, in sheep erythrocytes, decreased γ-glutamylcysteine synthetase, probable cause of, 713
Glycerol-induced acute renal failure after acute plasma renin activity suppression, 587
Glycoproteins, serum, and malaria in Ethiopia, 924
Glycosaminoglycans of intervertebral disc in idiopathic scoliosis, 938
Gold distribution in whole blood during chrysotherapy, 930
Granulocyte kinetics, intravascular, and spleen size in patients with neutropenia and chronic splenomegaly, 9
Guinea pigs, diphtheritic, defect in lipid mobilization from adipose tissue in, 187
peritoneal fluids, selective stimulation and purification of eosinophils and neutrophils from, 522

H

Hamster, induced alterations in rate-limiting enzymes of hepatic cholesterol and bile acid synthesis in, 858
Heart, kidney, liver, and muscle of potassium-deficient rats, protein metabolism in vivo in, 287
Hemoglobin-haptoglobin bond, dissociation of complex and recovery of native haptoglobin in affinity chromatography system, 991
S and C at birth, detection of, rapid screening procedure by column chromatography, 303
Hemolytic anemia, erythropoietin excretion in bone marrow failure and, 438
syndrome, rigid-red-cell, physical properties of red cells as related to effects in vivo, oxidant drugs producing abnormal intracellular concentration of hemoglobin (eccentrocytes) with, 898
Hepatitis B, prevention of with gamma globulin, antibody to Australia antigen, detection with simple radioimmune assay, incidence in military populations, and, 317
Hodgkin's disease and sarcoidosis, macrophage aggregation assay for cell-mediated immunity in man, studies of patients with, 682
Homovanillic acid, urinary, and iso-homovanillic acid by gas-liquid chromatography, and electron capture detection, separation and determination of, 829
4-Hydroxybenzioc acid hydrazide (PAHBAH) with other reagents for determination of glucose, comparison of, 649
Hypertension, chronic renal, in rat, effect of synthetic peptide on, 406

Hypertension—Cont'd
elevated circulating renin activity in rats following doses of cadmium known to induce, 399
Hypertrophy, right ventricular, reversible in experimentally induced pulmonary emboli, 962

I

*I-fibrinogen, unsatisfactory biologic behavior of, labeled by chloramine-T method, 267
IgG, IgA, and IgM cold-reactive immunoglobulins in 19 patients with elevated cold agglutinins, 67
Immunity, cell-mediated, in man, macrophage aggregation assay for, studies of patients with Hodgkin's disease and sarcoidosis, 682
Immunocore electrophoresis of urinary albumins, 326
Immunoglobulins, IgG, IgA, and IgM cold-reactive, in 19 patients with elevated cold agglutinins, 67
receptors on human leukocytes, differences between bone marrow and blood cells in multiple myeloma and chronic lymphocytic leukemia, effects of therapy, 611
Indicator dilution technique, simultaneous estimation of hepatic and portal blood flows by, 836
Ingestion, lead, dose-response to, in rats fed low dietary calcium, 92
Injection, intravenous glucose, estimation of early insulin response to, 101
Injury, radiation, patterns of pulmonary alveolar macrophage function following, 276
Insulin response, early, estimation of, to intravenous glucose injection, 191
Iso-homovanillic acid, separation and determination of urinary homovanillic acid and, by gas-liquid chromatography and electron capture detection, 829
Isotonic saline loading, exaggerated response to, in genetically hypertension prone rats, 597

K

Kidney, liver, muscle, and heart of potassium-deficient rats, protein metabolism in vivo in, 287
Kinetics, intravascular granulocyte, and spleen size in patients with neutropenia and chronic splenomegaly, 9

L

Lead ingestion, dose-response to, in rats fed low dietary calcium, 92
Lecithin and lysolecithin by gallbladder, absorption of, 891
Leukemia, acute nonlymphocytic, thrombokinetics in, 911
platelet metabolism in, 54
Leukemia—Cont'd
chronic lymphocytic, and multiple myeloma, effects of therapy, immunoglobulin receptors on human leukocytes, differences between bone marrow and blood cells in, 611
Leukocytes, human, immunoglobulin receptors on, differences between bone marrow and blood cells in multiple myeloma and chronic lymphocytic leukemia, effects of therapy, 611
peripheral, from rheumatoid arthritis and systemic lupus erythematosus patients measured by histochemical and spectrophotometric method, nitroblue tetrazolium dye reduction by, 513
Lex-O_2-Con, oxygen content determination using a new analyzer, 342
Light transmission properties, quantitative parameterization of, of citrated, platelet-rich plasma as a function of platelet and adenosine diphosphate concentrations and temperature, 137
Lipid mobilization from adipose tissue in diphtheritic guinea pigs, defect in, 187
platelet, metabolism, effect of epinephrine on, 554
Lipoprotein cholesterol, estimation versus measurement with preparative ultracentrifuge, cord-blood low-density, 467
phenotyping, progress report on, 529
plasma, labeling with radioactive cholesterol, 111
measurement without ultracentrifugation, dual precipitation method for quantitative, 473
Liver, kidney, muscle, and heart of potassium-deficient rats, protein metabolism in vivo in, 287
rat, fatty, effect of oleate and ethanol, gluconeogenesis in, 419
perfused, treated with phalloidin, rate of release of cytoplasmic and mitochondrial enzymes from isolated and, 695
Lung, effect of pulmonary edema on antibacterial defenses of, 634
rodent, effects of oxygen consumption of mitochondria, ozone interaction with, 357
Lupus erythematosus, systemic, patients measured by histochemical and spectrophotometric method, nitroblue tetrazolium dye reduction by peripheral leukocytes from rheumatoid arthritis and, 513
systemic, scleroderma, and mixed connective tissue disease, ribonucleoprotein antibodies, frequency and clinical significance in, 769
Lymphocyte function in normal people with persistent Australia antigen, 79
homologous, antigens, and mitogens, whole-blood culture technique for functional studies of lymphocyte reactivity to, 500

Lymphocyte—Cont'd
reactivity to mitogens, antigens, and homologous lymphocytes, whole-blood culture technique for functional studies of, 500
Lymphocytic leukemia, chronic, and multiple myeloma, effects of therapy, immunoglobulin receptors on human leukocytes, differences between bone marrow and blood cells in, 611
Lysolecithin and lecithin by gallbladder, absorption of, 891

M

Macrophage aggregation assay for cell-mediated immunity in man, studies of patients with Hodgkin's disease and sarcoidosis, 682
function, pulmonary alveolar, following radiation injury, patterns of, 276
Malaria in Ethiopia, serum glycoproteins and, 924
Membrane protein of incubated human erythrocytes, prehemolytic changes in, 719
Mercaptans, volatile, in whole blood, measurement of, 674
Metabolism of dihydroxyacetone by intact erythrocytes, 534
platelet, in acute leukemia, 54
lipid, effect of epinephrine on, 554
protein, in vivo in kidney, liver, muscle, and heart of potassium-deficient rats, 287
Methotrexate, cycling characteristics of endogenous spleen colony-forming cells as measured with cytosine arabinoside and, 727
Methylene blue, biochemical and ultrastructural effects of, nitroblue tetrazolium reduction by neutrophils, 20
-induced serotonin release in human platelets, 546
Mithramycin, effect of, on normal and abnormal bone turnover, 576
Mitochondria, ozone interaction with rodent lung, effects on oxygen consumption of, 357
Mitochondrial and cytoplasmic enzymes from the isolated and perfused rat liver treated with phalloidin, rate of release of, 695
structure in man, phenformin-induced alterations of small intestinal function and, 195
Mitogens, antigens, and homologous lymphocytes, whole-blood culture technique for functional studies of lymphocyte reactivity to, 500
Monosaccharides and polyols in diabetes mellitus and uremia, 809
Mucopolysaccharidosis, β-glucuronidase deficiency, methods for enzymatic diagnosis, 969
Mucus, activation of coagulation by extracts of, possible pathway of intravascular coagulation accompanying adenocarcinomas, 255
Muscle, kidney, liver, and heart of potassium-deficient rats, protein metabolism in vivo in, 287
Myeloma, multiple and chronic lymphocytic leukemia, effects of therapy, immunoglobulin receptors on human leukocytes, differences between bone marrow and blood cells in, 611

N

Neoplasia in NZB/NZW mice treated with long-term cyclophosphamide, augmented incidence of, 619
Neutropenia and chronic splenomegaly, intravascular granulocyte kinetics and spleen size in patients with, 9
Neutrophils and eosinophils from guinea pig peritoneal fluids, selective stimulation and purification of, 522
movement, new familial defect of, 1
nitroblue tetrazolium reduction by, biochemical and ultrastructural effects of methylene blue, 20
Nitroblue tetrazolium dye reduction by peripheral leukocytes from rheumatoid arthritis and systemic lupus erythematosus patients measured by histochemical and spectrophotometric method, 513
reduction by neutrophils, biochemical and ultrastructural effects of methylene blue, 20
Nucleic acids, collagen, and noncollagenous protein of connective tissue, effect of zinc deficiency on, 951
NZB/NZW mice treated with long-term cyclophosphamide, augmented incidence of neoplasia in, 619

O

Oleate and ethanol, effect of, gluconeogenesis in fatty liver of rat, 419
Oral contraceptives and folate absorption, 869
Organic phosphate compounds in outdated bank blood, role of fructose in restoration of, 489
Osteoporosis, experimentally induced, influence of diphosphonates on progress of, 567
Oxygen consumption of mitochondria, ozone interaction with rodent lung, effects on, 357
content determination using a new analyzer: the Lex-O_2-Con, 342
Ozone interaction with rodent lung, effects on oxygen consumption of mitochondria, 357

P

Pancreatic enzyme secretion, intraluminal and postabsorptive effects of amino acids on, 241
Pemphigoid and pemphigus, studies of antibodies, 249
Pemphigus and pemphigoid, studies of antibodies, 249
Peptide, synthetic, on chronic renal hypertension in rat, effect of, 406

Peritoneal fluids, guinea pig, selective stimulation and purification of eosinophils and neutrophils from, 522
Phalloidin, rate of release of cytoplasmic and mitochondrial enzymes from isolated and perfused rat liver treated with, 695
Phenformin-induced alterations of small intestinal function and mitochondrial structure in man, 195
Phenotyping, lipoprotein, progress report on, 529
Phosphatases, acid, in human plasma, 446
Phosphatidate phosphatase in human platelets, 663
Pigeon antigens in sera of asymptomatic pigeon breeders, precipitating antibody against, 372
hypercholesterolemic, cholesterol balance and turnover in genetically, their response to treatment with a hypocholesterolemic drug, cholestane-3β, 5α,6β-triol, 793
Pigments, bile, of body fluids, qualitative analysis by thin-layer chromatography, free and conjugated, 483
Plasma cholesterol, total, using gas-liquid chromatography, micromethod for analysis of, 656
citrated, platelet-rich, quantitative parameterization of light transmission properties of, as a function of platelet and adenosine diphosphate contentrations and temperature, 137
digoxin levels in normal human volunteers following chronic oral and intramuscular administration, 201
human, acid phosphatases in, 446
lipoproteins, labeling, with radioactive cholesterol, 111
measurement without ultracentrifugation, dual precipitation method for quantitative, 473
normal human, in presence and absence of anticoagulants, determination of fibrinogen in, 822
peripheral, specific radioimmunoassay for testosterone in, 309
renin activity suppression, acute, glycerol-induced renal failure after, 587
Platelets, adherence of, to collagen-coated surface, development of quantitative method, 978
aggregation, factor X-induced, the role of heparin and the plasma inhibitor to activated factor X, inhibition of activated, 390
factor 4— antiheparin protein releasable from platelets, purification and properties, 754
function and survival in sickle cell disease, 44
human, methylene blue-induced serotonin release in, 546
lipid metabolism, effect of epinephrine on, 554
metabolism in acute leukemia, 54
phosphatidate phosphatase in human, 663
purification and properties, platelet factor 4— antiheparin protein releasable from, 754
Polyols in diabetes mellitus and uremia, monosaccharides and, 809
Potassium-deficient rats, protein metabolism in vivo in kidney, liver, muscle, and heart of, 287
renal ammoniagenesis and tissue glutamine, glutamine synthetase, and glutaminase I levels in, 208
Prostaglandins, enhancement of erythropoiesis by, 704
Protein, antiheparin, releasable from platelets, purification and properties, platelet factor 4—, 754
membrane, of incubated human erythrocytes, prehemolytic changes in, 719
metabolism in vivo in kidney, liver, muscle, and heart of potassium-deficient rats, 287
noncollagenous, nucleic acids, and collagen of connective tissue, effect of zinc deficiency on, 951
Puerto Ricans, variants of glucose-6-phosphate dehydrogenase (G-6-PD) associated with G-6-PD deficiency in, 432
Pulmonary alveolar macrophage function following radiation injury, patterns of, 276
edema on antibacterial defenses of the lung, effect of, 634

R

Radiation injury, patterns of pulmonary alveolar macrophage function following, 276
Radioimmune assay, simple, detection with, incidence in military populations, and role in prevention of hepatitis B with gamma globulin, antibody to Australia antigen, 317
Radioimmunoassay, specific, for testosterone in peripheral plasma, 309
Radioimmunologic measurements of naturally occurring bacterial antibodies, human serum antibodies reactive with *Escherichia coli* in gastrointestinal and immunologic disorders, 125
Rat, acute and chronic effects of ethanol administration on bile secretion in, 215
effect of synthetic peptide on chronic renal hypertension in, 406
elevated circulating renin activity in, following doses of cadmium known to induce hypertension, 399
fatty liver of, effect of oleate and ethanol, gluconeogenesis in, 419
fed low dietary calcium, dose-response to lead ingestion in, 92
hypertension-prone, genetically, exaggerated response to isotonic saline loading in, 597
liver, perfused, treated with phalloidin, rate of release of cytoplasmic and mitochondrial enzymes from isolated and, 695
potassium-deficient, renal ammoniagenesis and tissue glutamine, glutamine synthetase, and glutaminase I levels in, 208

Rat—Cont'd
protein metabolism in vivo in kidney, liver, muscle, and heart of potassium-deficient, 287
Red cell aplasia, studies on pure, development of two-stage erythroblast cytotoxicity method and role of complement, 31
density in various blood disorders, 297
physical properties of, as related to effects in vivo, oxidant drugs producing abnormal intracellular concentration of hemoglobin (eccentrocytes) with a rigid-red-cell hemolytic syndrome, 898
Renal ammoniagenesis and tissue glutamine, glutamine synthetase, and glutaminase I levels in potassium-deficient rats, 208
concentrating mechanism, effects of aldosterone and cortisol on, 784
disease, chronic, total body calcium and long-term calcium balance in, 226
failure, acute, glycerol-induced, after acute plasma renin activity suppression, 587
Renin activity, elevated circulating, in rats following doses of cadmium known to induce hypertension, 399
Rheumatoid arthritis and systemic lupus erythematosus patients measured by histochemical and spectrophotometric method, nitroblue tetrazolium dye reduction by peripheral leukocytes from, 513
Ribonuclease and deoxyribonuclease activities in zinc-deficient tissues, 461
Ribonucleoprotein antibodies, frequency and clinical significance in systemic lupus erythematosus, scleroderma, and mixed connective tissue disease, 769
Rodent lung, effects of oxygen consumption of mitochondria, ozone interaction with, 357

S

Sarcoidosis, macrophage aggregation assay for cell-mediated immunity in man, studies of patients with Hodgkins disease and, 682
Scleroderma, systemic lupus erythematosus, and mixed connective tissue disease, ribonucleoprotein antibodies, frequency and clinical significance in, 769
Scoliosis, idiopathic, glycosaminoglycans of intervertebral disc in, 938
Secretion, pancreatic enzyme, intraluminal and postabsorptive effects of amino acids on, 241
Sensitivity, tuberculin, mechanism of cortisol inhibition of adoptive transfer of, 366
Serotonin release in human platelets, methylene blue-induced, 546
Serum B_1C globulin to fibrinolysis in patients with poststreptococcal acute glomerulonephritis, relationship of, 776
Serum—Cont'd
glycoproteins and malaria in Ethiopia, 924
induction of emphysema with elastase, evolution of lesion and influence of, 349
thyrotropin, Wick chromatography for immunoassay of, 158
Sheep erythrocytes, decreased γ-glutamylcysteine synthetase, probable cause of glutathione deficiency in, 713
Sickle cell disease, platelet function and survival in, 44
Small intestinal function, phenformin-induced alterations of, and mitochondrial structure in man, 195
Spleen colony-forming cells, endogenous, as measured with cytosine arabinoside and methotrexate, cycling characteristics of, 727
units, cell-cycling characteristics of exogenous, 740
Splenomegaly, chronic, and neutropenia, intravascular granulocyte kinetics and spleen size in patients with, 9
Stuart-Prower factor, deficiency, canine factor X, 560

T

Testosterone in peripheral plasma, specific radioimmunoassay for, 309
Tetrazolium, nitroblue, reduction by neutrophils, biochemical and ultrastructural effects of methylene blue, 20
Thin-layer chromatography, free and conjugated bile pigments of body fluids, qualitative analysis by, 483
Thrombokinetics in acute nonlymphocytic leukemia, 911
Thyrotropin, serum, Wick chromatography for immunoassay of, 158
Tissue, adipose, in diphtheritic guinea pigs, defect in lipid mobilization from, 187
glutamine, glutamine synthetase, and glutaminase I levels in potassium-deficient rats, renal ammoniagenesis and, 208
Tissues, zinc-deficient, ribonuclease and deoxyribonuclease activities in, 461
Tuberculin sensitivity, mechanism of cortisol inhibition of adoptive transfer of, 366

U

Ultracentrifugation, dual precipitation method for quantitative plasma lipoprotein measurement without, 473
Ultracentrifuge, cord-blood low-density lipoprotein cholesterol, estimation versus measurement with preparative, 467
Urate, drug-induced displacement of, from its albumin-binding sites, studies with some novel uricosuric agents and their metabolites, correlation between clinical activity and, 412

Uremia, monosaccharides and polyols in diabetes mellitus and, 809
Uricosuric agents and their metabolites, correlation between clinical activity and drug-induced displacement of urate from its albumin-binding sites, studies with some, 412
Urinary fibrin degradation products, characterization and significance of, 377
Urine, deuterium oxide in, rapid method for determination of, application to measurement of total body water, 170

W

Water, total body, rapid method for determination of deuterium oxide in urine, application to measurement of, 170
Wick chromatography for immunoassay of serum thyrotropin, 158

Z

Zinc deficiency on nucleic acids, collagen, and noncollagenous protein of connective tissue, effect of, 951
deficient tissues, ribonuclease and deoxyribonuclease activities in, 461
